

Project name: E-commerce website testing

Module Name: Module

Webpage URI - <https://www.google.com>,
<https://the-internet.herokuapp.com/login>

Testcase ID: TC1

Testcase: Verify Google Homepage Title

code :

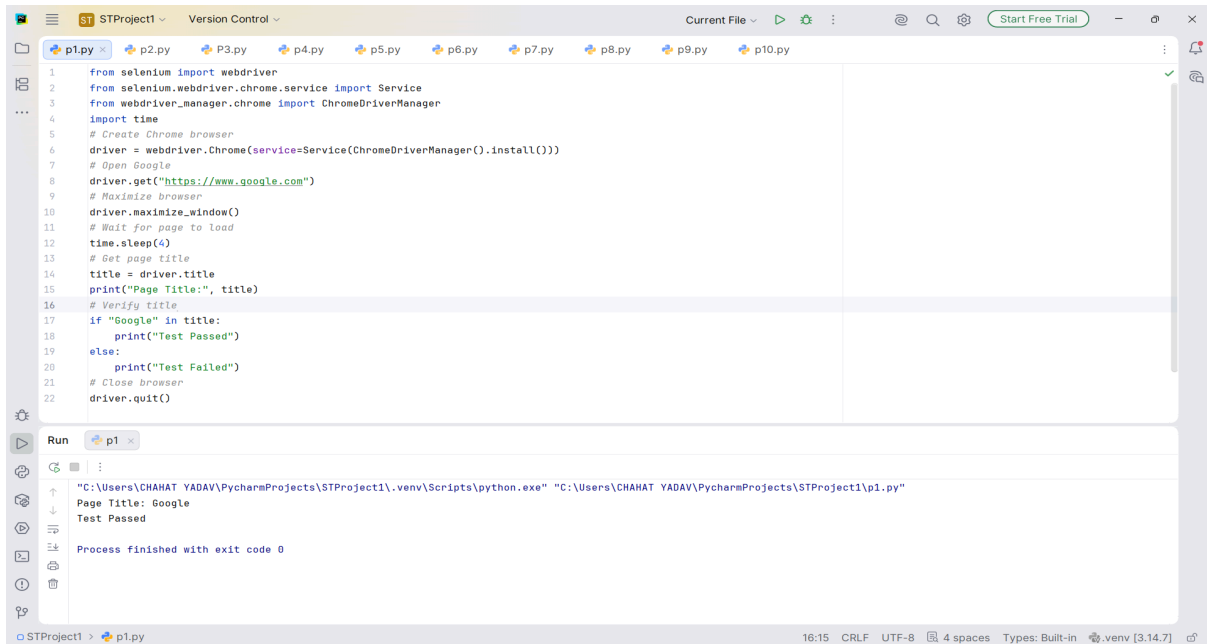

```
from selenium import webdriver
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time
# Create Chrome browser
driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))
# Open Google
driver.get("https://www.google.com")
# Maximize browser
driver.maximize_window()
# Wait for page to load
time.sleep(4)
# Get page title
title = driver.title
print("Page Title:", title)
# Verify title
if "Google" in title:
    print("Test Passed")
else:
    print("Test Failed")
# Close browser
driver.quit()
```

Output:

TUTORIAL 11

Page Title: Google
Test Passed

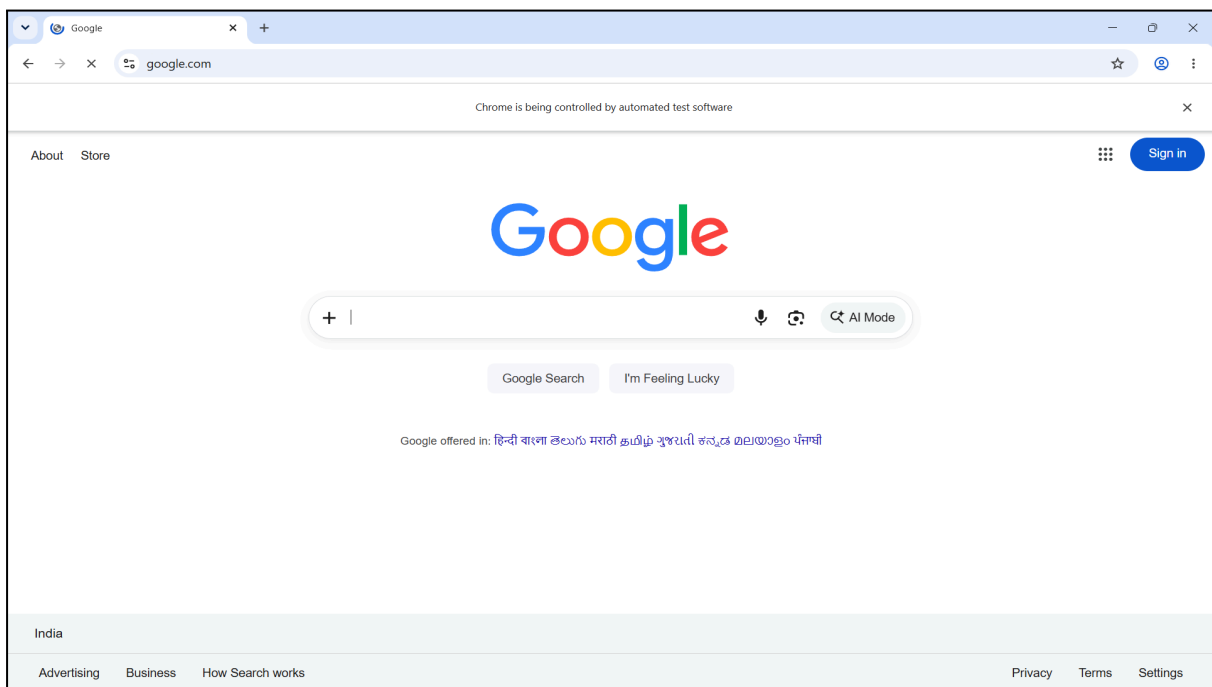

Screenshots:

```
1 from selenium import webdriver
2 from selenium.webdriver.chrome.service import Service
3 from webdriver_manager.chrome import ChromeDriverManager
4 import time
5 # Create Chrome browser
6 driver = webdriver.Chrome(service=Service(ChromeDriverManager().install()))
7 # Open Google
8 driver.get("https://www.google.com")
9 # Maximize browser
10 driver.maximize_window()
11 # Wait for page to load
12 time.sleep(4)
13 # Get page title
14 title = driver.title
15 print("Page Title:", title)
16 # Verify title
17 if "Google" in title:
18     print("Test Passed")
19 else:
20     print("Test Failed")
21 # Close browser
22 driver.quit()
```

Run p1

```
"C:\Users\CHAHAT YADAV\PycharmProjects\STProject1\.venv\Scripts\python.exe" "C:\Users\CHAHAT YADAV\PycharmProjects\STProject1\p1.py"
Page Title: Google
Test Passed
Process finished with exit code 0
```

Testcase ID: TC2

Testcase: Verify valid login with tomsmith / SuperSecretPassword!

code :

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time

driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))
try:
    driver.get("https://the-internet.herokuapp.com/login")
    driver.maximize_window()
    time.sleep(2)

    username = driver.find_element(By.ID, "username")
    password = driver.find_element(By.ID, "password")
    time.sleep(4)
    login_button = driver.find_element(
        By.CSS_SELECTOR,
        "button[type='submit']"
    )

    username.send_keys("tomsmith")
    password.send_keys("SuperSecretPassword!")

    login_button.click()

    time.sleep(3)

    if "secure" in driver.current_url:
        print("Login Test Passed")
    else:
        print("Login Test Failed")

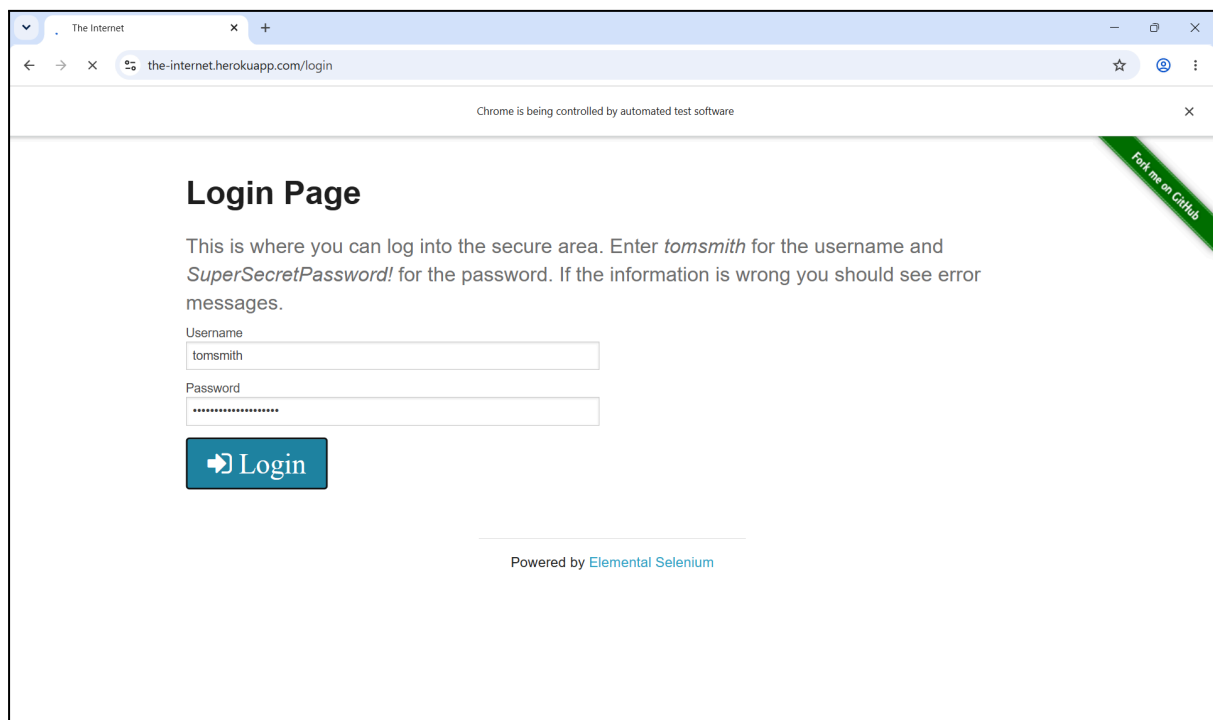

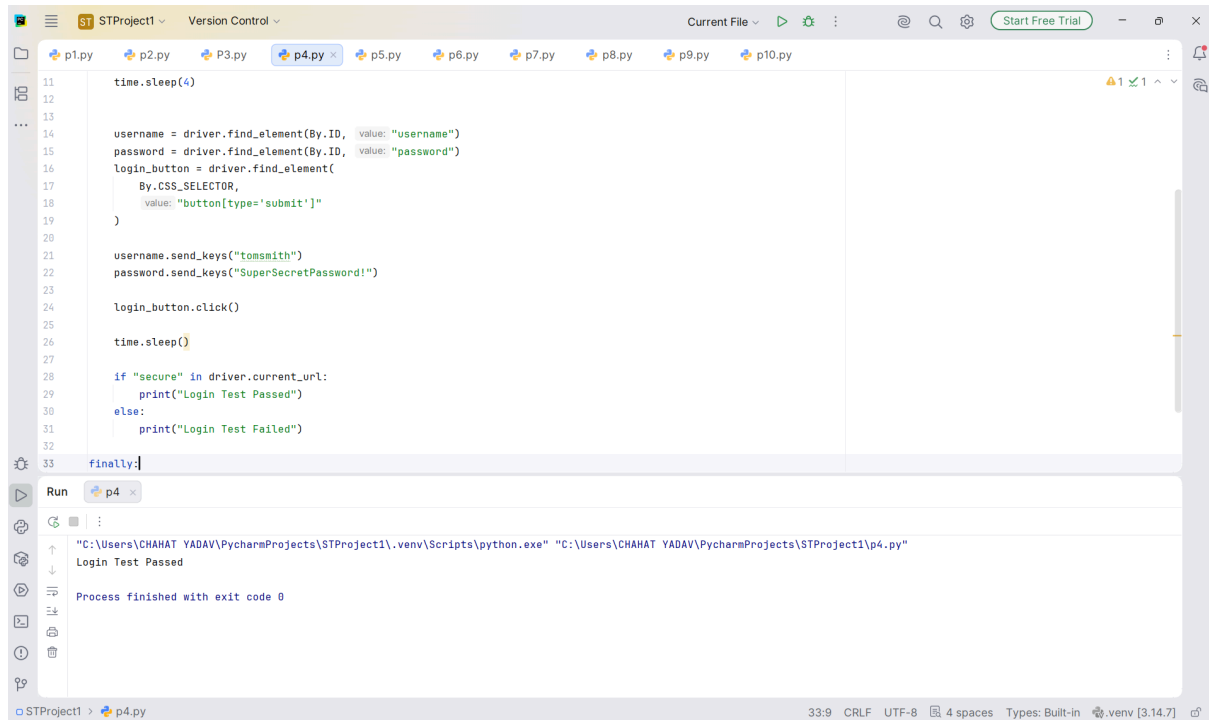

finally:
    driver.quit()
```

TUTORIAL 11

Output:

Current URL: <https://the-internet.herokuapp.com/secure>

Screenshots:

Testcase ID: TC3

Testcase: Verify login fails with invalid password (Negative Testing)

code :

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time

driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))
try:
    driver.get("https://the-internet.herokuapp.com/login")
    driver.maximize_window()
    time.sleep(2)

    username = driver.find_element(By.ID, "username")
    password = driver.find_element(By.ID, "password")
    login_button = driver.find_element(
        By.CSS_SELECTOR,
        "button[type='submit']"
    )

    username.send_keys("tomsmith")

    # Wrong password intentionally
    password.send_keys("WrongPassword")

    login_button.click()

    time.sleep(2)

    if "secure" in driver.current_url:
        print("Test Passed")
    else:
        print("Test Failed: Invalid login was correctly
rejected")
```

TUTORIAL 11

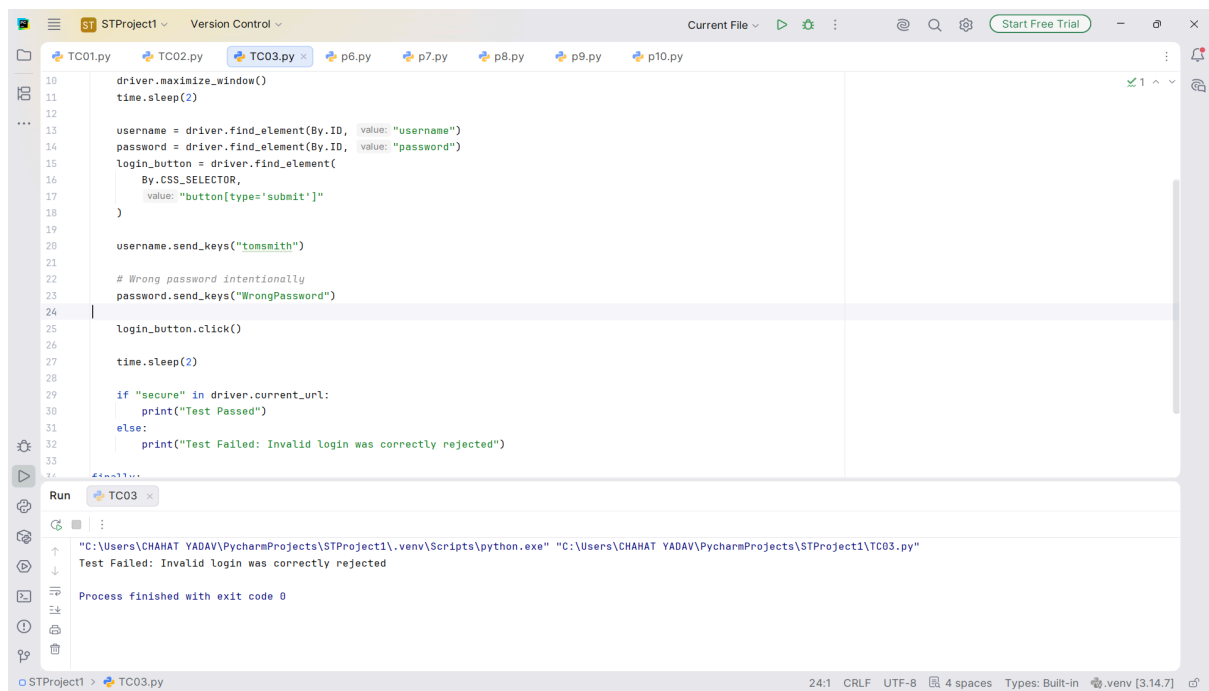

```
finally:  
    driver.quit()
```

Output:

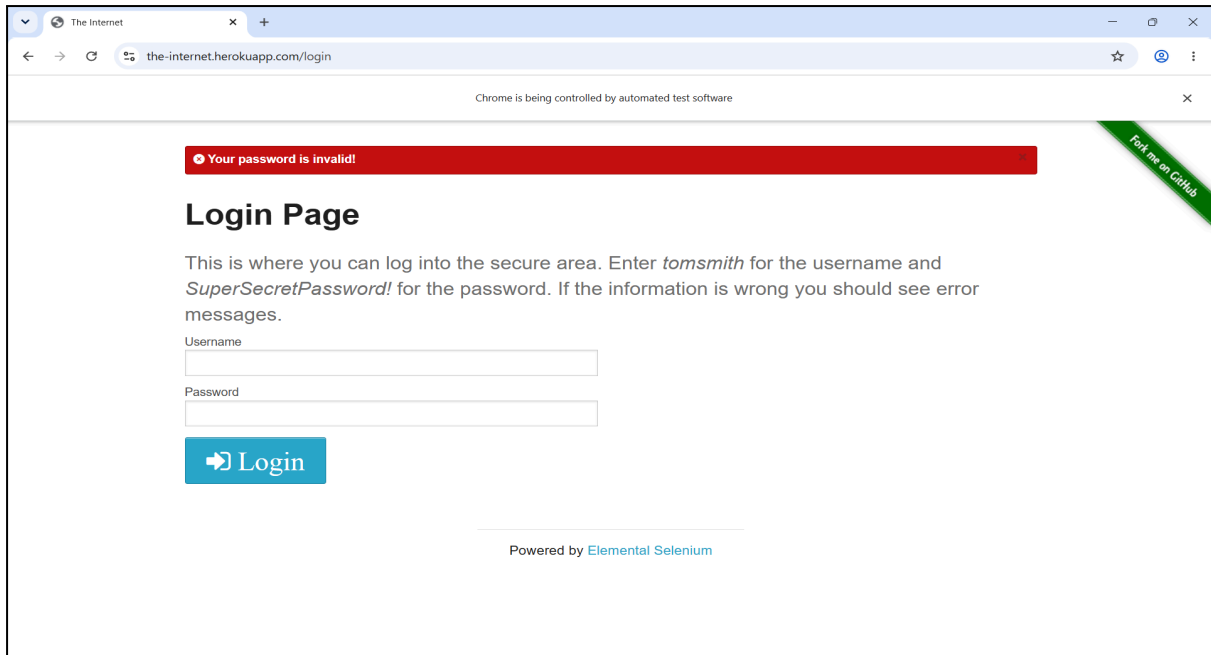

Username (Valid): tomsmith

Password (Invalid - Intentionally Wrong): WrongPassword

Screenshots:

TUTORIAL 11

Testcase ID: TC4

Testcase: Verify navigation via Link - Click "Form Authentication"

code :

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time

driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))

driver.get("https://the-internet.herokuapp.com/")
driver.maximize_window()

time.sleep(2)

# Click "Form Authentication"
link = driver.find_element(By.LINK_TEXT, "Form
Authentication")

link.click()

time.sleep(3)
```

TUTORIAL 11

```
print("Current Page:", driver.title)
print("Current URL:", driver.current_url)

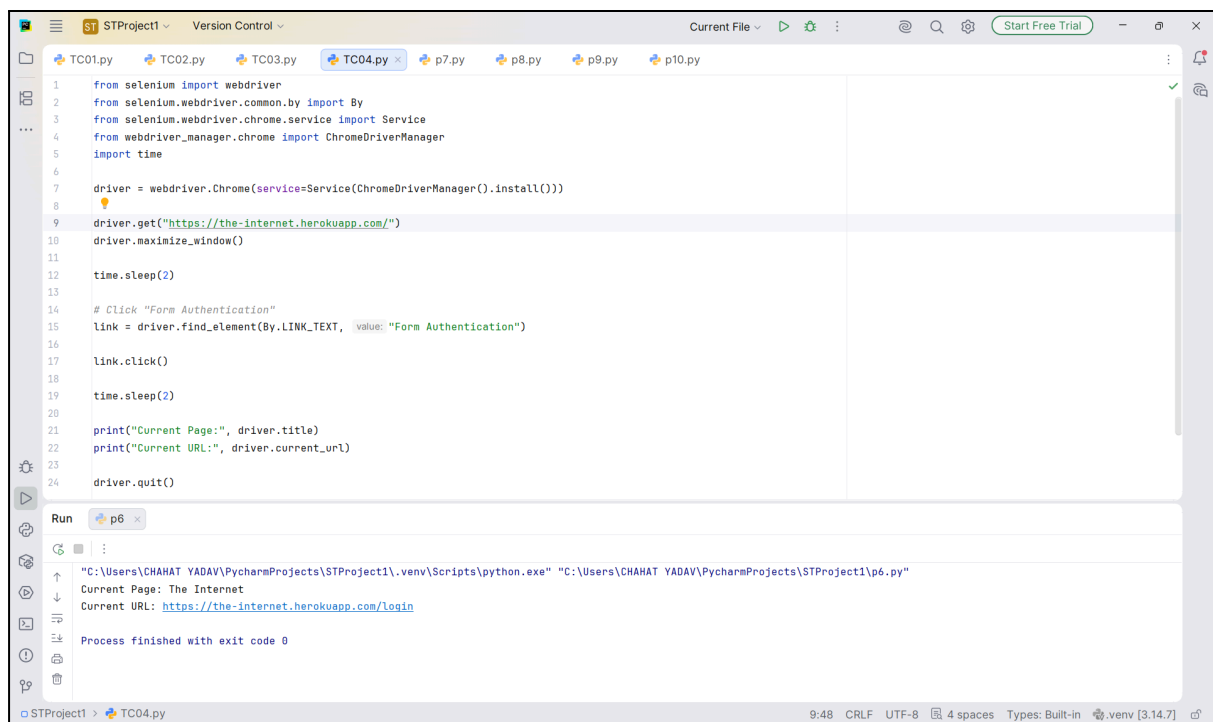

driver.quit()
```

Output:

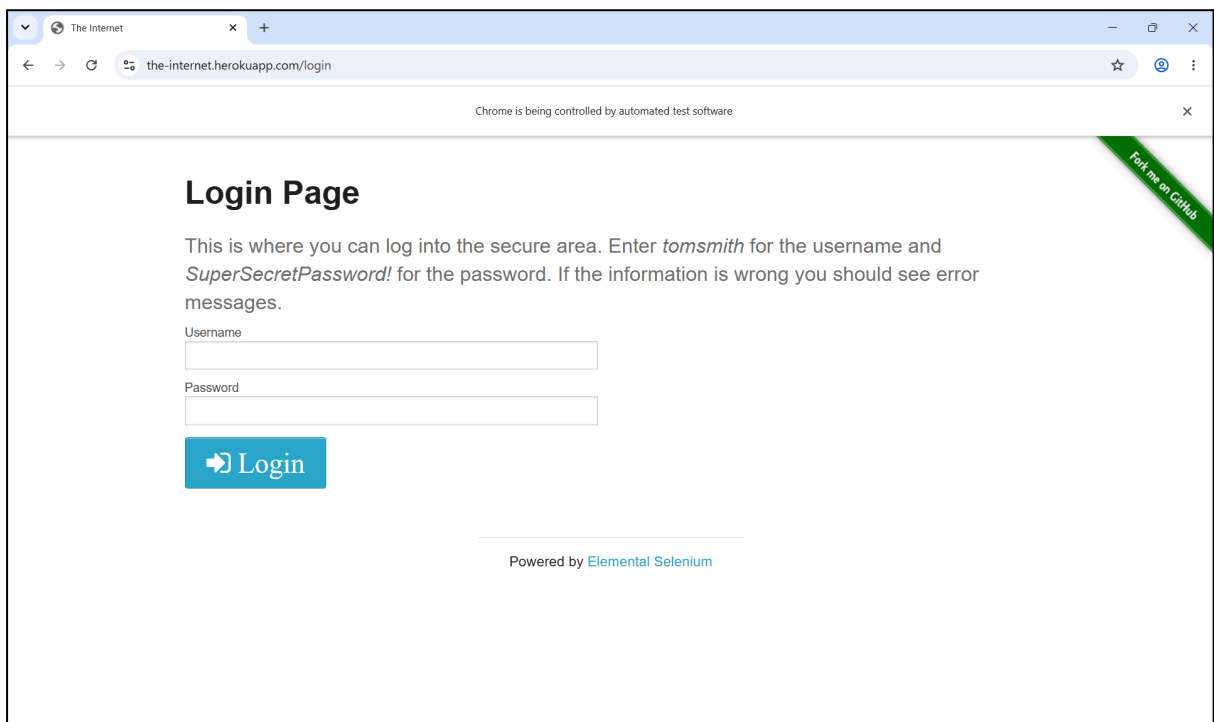

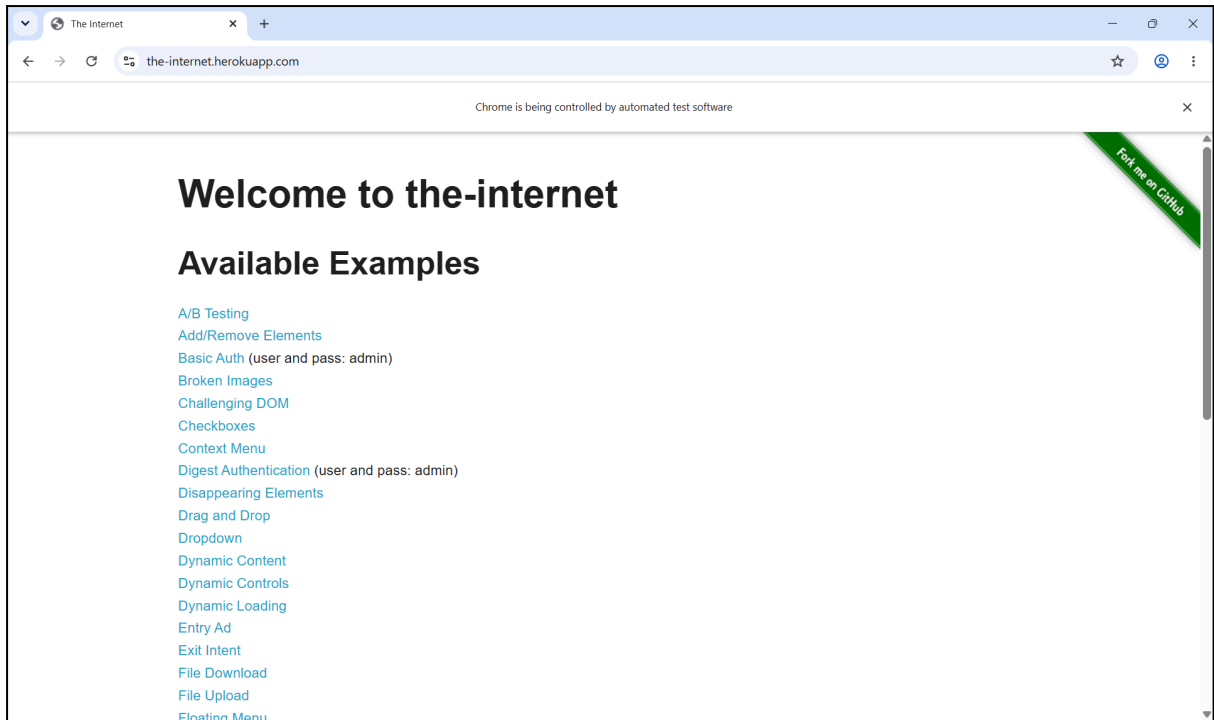

Current Page: The Internet Current

URL: <https://the-internet.herokuapp.com/login>

Screenshots:

Testcase ID: TC5

Testcase: Verify dropdown selection functionality**code :**

```

from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.support.ui import Select
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time
driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))
driver.get("https://the-internet.herokuapp.com/dropdown")
driver.maximize_window()
time.sleep(4)
# Locate dropdown
dropdown = driver.find_element(By.ID, "dropdown")
# Create Select object
select = Select(dropdown)
# Select Option 2
select.select_by_visible_text("Option 2")
time.sleep(3)
# Print selected option
selected = select.first_selected_option.text
print("Selected Option:", selected)
driver.quit()

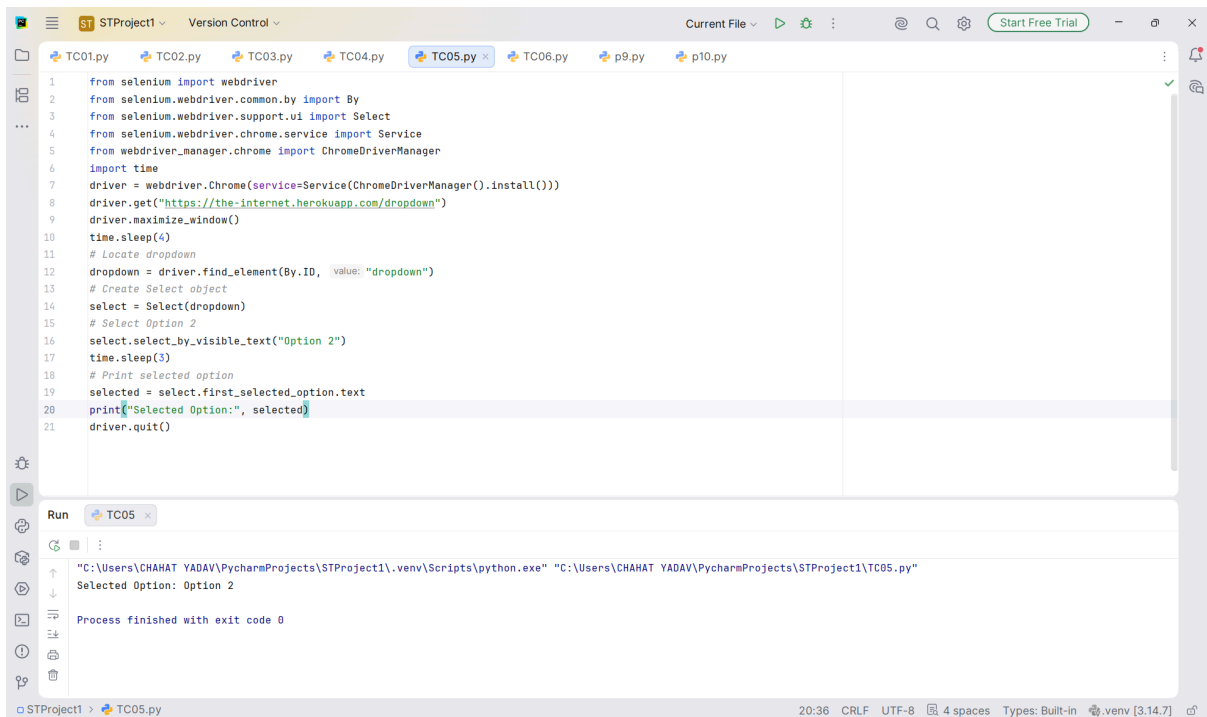

```

Output:

Selected Option: Option 2

TUTORIAL 11

Screenshots:

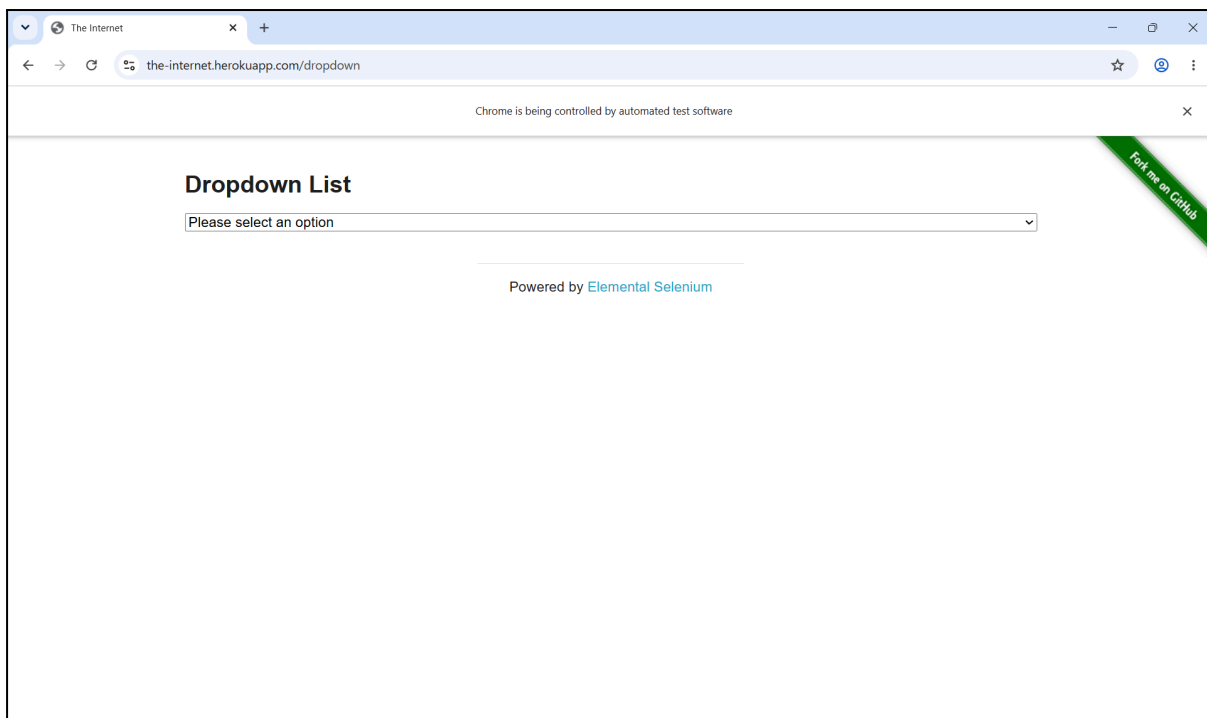

The screenshot shows the PyCharm IDE interface. The top toolbar includes icons for file operations, a search icon, and a 'Start Free Trial' button. The file explorer on the left shows a project named 'STProject1' with several Python files: TC01.py, TC02.py, TC03.py, TC04.py, TC05.py (selected), TC06.py, p9.py, and p10.py. The main editor displays the code for TC05.py, which is a Selenium script for interacting with a dropdown menu on 'the-internet.herokuapp.com/dropdown'. The script imports webdriver, By, Select, and Service from selenium, and ChromeDriverManager from webdriver_manager.chrome. It sets up a Chrome driver, navigates to the URL, maximizes the window, waits for 4 seconds, finds the dropdown element, creates a Select object, and selects the second option. It then prints the selected option and quits the driver.

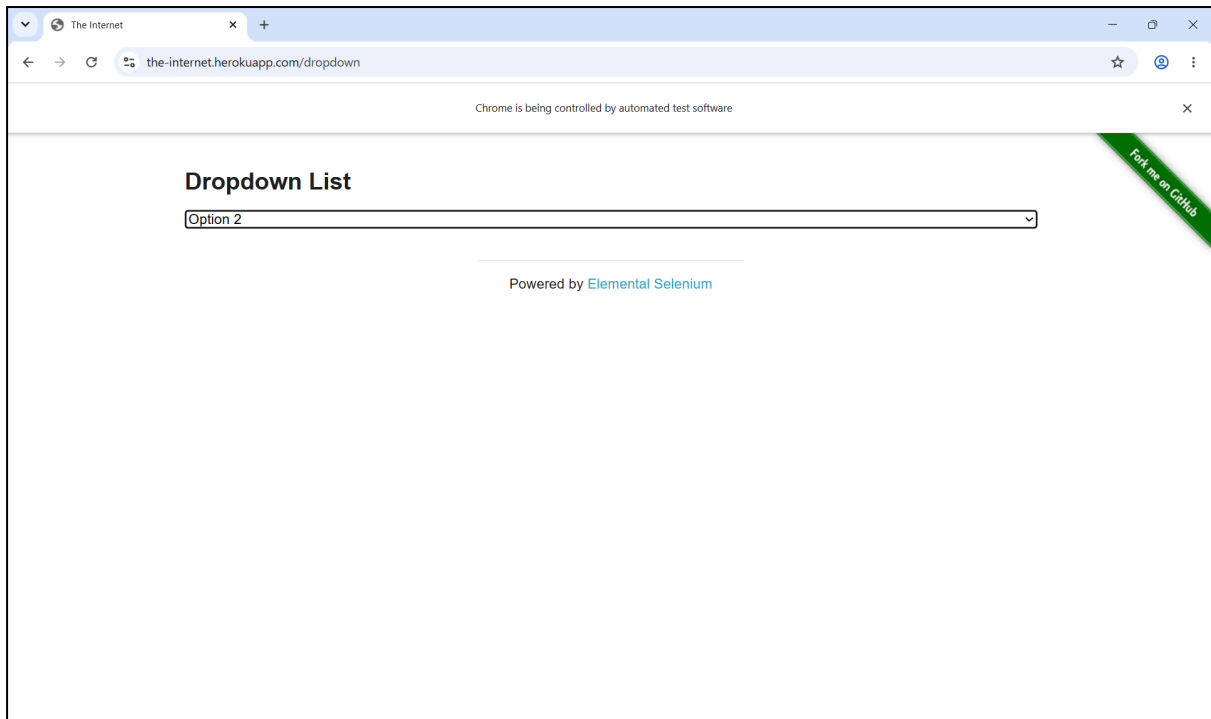

```
1 from selenium import webdriver
2 from selenium.webdriver.common.by import By
3 from selenium.webdriver.support.ui import Select
4 from selenium.webdriver.chrome.service import Service
5 from webdriver_manager.chrome import ChromeDriverManager
6 import time
7 driver = webdriver.Chrome(service=Service(ChromeDriverManager().install()))
8 driver.get("https://the-internet.herokuapp.com/dropdown")
9 driver.maximize_window()
10 time.sleep(4)
11 # Locate dropdown
12 dropdown = driver.find_element(By.ID, value="dropdown")
13 # Create Select object
14 select = Select(dropdown)
15 # Select Option 2
16 select.select_by_visible_text("Option 2")
17 time.sleep(3)
18 # Print selected option
19 selected = select.first_selected_option.text
20 print("Selected Option:", selected)
21 driver.quit()
```

Below the editor, the 'Run' tab shows the execution output for TC05.py. The command executed is: `"C:\Users\CHAHAT YADAV\PycharmProjects\STProject1\.venv\Scripts\python.exe" "C:\Users\CHAHAT YADAV\PycharmProjects\STProject1\TC05.py"`. The output is: `Selected Option: Option 2`. The process finished with exit code 0.

The bottom status bar shows the file path: `STProject1 > TC05.py`, the time: 20:36, and various settings: CRLF, UTF-8, 4 spaces, Types: Built-in, .venv [3.14.7].

TUTORIAL 11

Testcase ID: TC6

Testcase: Verify checkbox selection

code :

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.support.ui import Select
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager
import time

driver =
webdriver.Chrome(service=Service(ChromeDriverManager().install
()))
driver.get("https://the-internet.herokuapp.com/checkboxes")
driver.maximize_window()
time.sleep(4)
```

TUTORIAL 11

```
# Find all checkboxes
checkboxes = driver.find_elements(By.CSS_SELECTOR,
                                "input[type='checkbox']")
print("Number of checkboxes:", len(checkboxes))
# Select first checkbox if not selected
if not checkboxes[0].is_selected():
    checkboxes[0].click()
print("First checkbox selected:",
      checkboxes[0].is_selected())
# Select second checkbox if not selected
if not checkboxes[1].is_selected():
    checkboxes[1].click()
print("Second checkbox selected:",
      checkboxes[1].is_selected())
driver.quit()
```

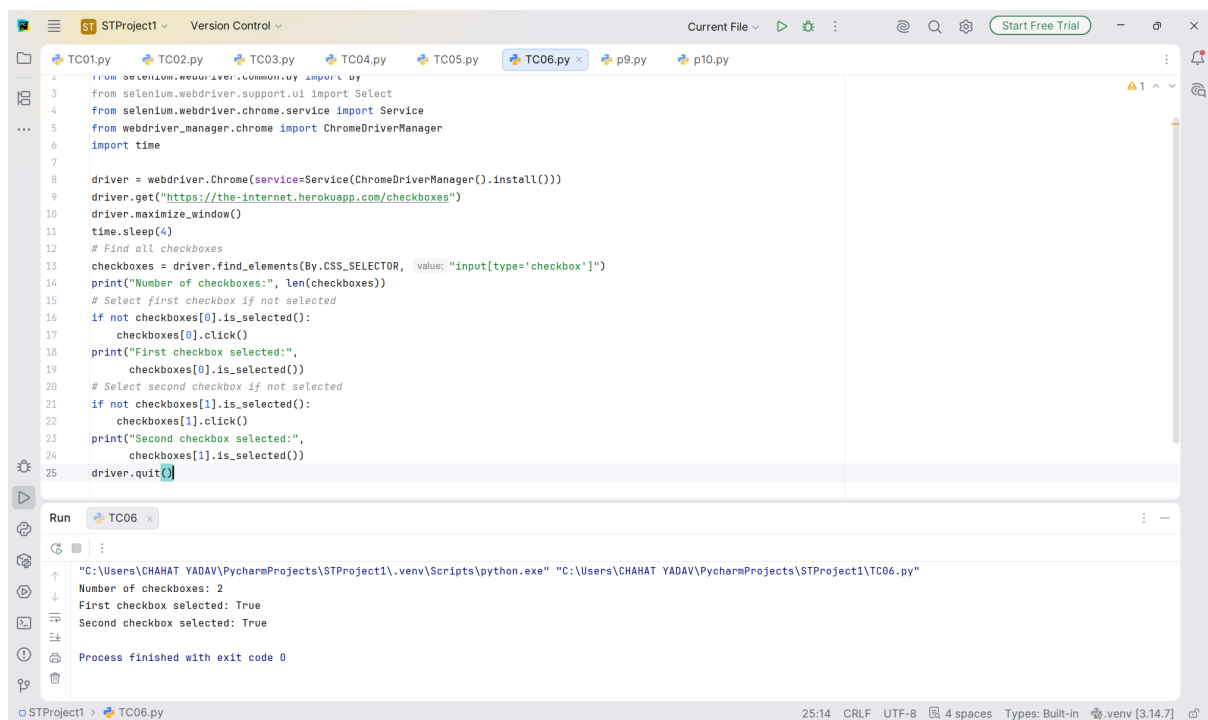

Output:

Number of checkboxes: 2

First checkbox selected: True

Second checkbox selected: True
